Have you communicated to Blythe that the document needs to be signed right away? What is to prevent the Council from taking its time and just letting the document sit there for a while? Getting this to the finish line is one of the Administrator's highest priorities; it should be treated as such.

Carl,

Today is my RDO. I am not planning on being in the office. The ACHP should already have a copy of the PA. Region 9 sent her a copy earlier this week.

Liz

Great, Ray. Thanks. Perhaps Liz can hand-carry the signature page to the Council today. I sent a note to Blythe advising of the need to execute the instrument quickly. Carl

Carl, except for the ACHP's signature on the PA and final review of the mitigation monitoring plan the ROD is ready for Leslie's signature. Leslie has the ROD and attachments for his review. Hopefully, everything will be done tomorrow. Ray

Subject: CLOSING THE BOOK ON THE ENVIRONMENTAL PROCESS FOR HONOLULU...

Good Morning:

AR00086973

I expect that the Administrator will ask me tomorrow (Friday) if the environmental process for Honolulu has been completed. By sometime late today or early tomorrow morning, please let me know where matters stand, including which signatories have and have not signed the programmatic agreement and when you reasonably expect that all signatories will have signed off (in this regard, please don't let the document languish on any signatory's desk; "encourage" him or her to sign it right away). I get the sense that the record of decision will be ready to sign whenever the programmatic agreement has been executed; am I sensing correctly? Thanks.
